Cox Science Center  
Annex Building  
Dreher Park  
4800 Dreher Trail North

As requested by members at the May meeting, the topic for this month will be the pros and cons of pinpointers. All members, please bring your pinpointers to the meeting.

## 2024 DUES

Please bring in your dues to our next meeting. The amount is \$35. Dues are now considered late (with a \$5 late fee). Both checks and cash are accepted.

## Birthdays

Kevin Maranville	6/6
Paul Hamlin	6/9
Margaret Weller	6/16
John DeCarion	6/24

## FOR SALE / REMINDERS

If you have metal detecting related items to sell, you can bring them in to the meetings. A table will be made available for sale items.

For all those pull tabs and eyeglasses that you find, please bring them to the club meetings. The pull tabs are sent to Ronald McDonald House charities. They turn the pull tabs in as scrap metal and the money goes to the charity.

The eyeglasses go to organizations that provide glasses for those who are in need.

# TIPS

## **DON'T ABANDON IFFY SIGNALS**

Digging the signal that doesn't sound encouraging or that you don't think indicates anything of value, can prove to be worth your time. Sometimes those iffy targets turn out to be something great. If you have time, dig them. If it doesn't turn out to be anything worthwhile, at least you're clearing the surface junk away for a more rewarding hunting trip.

## **THERE IS NO SUCH THING AS HUNTED OUT**

Never discount a site because it's been "hunted out". If a site has produced significant finds already, it's possible that there is more treasure there. Changing the depth and sensitivity settings on your detector may help you locate more finds.

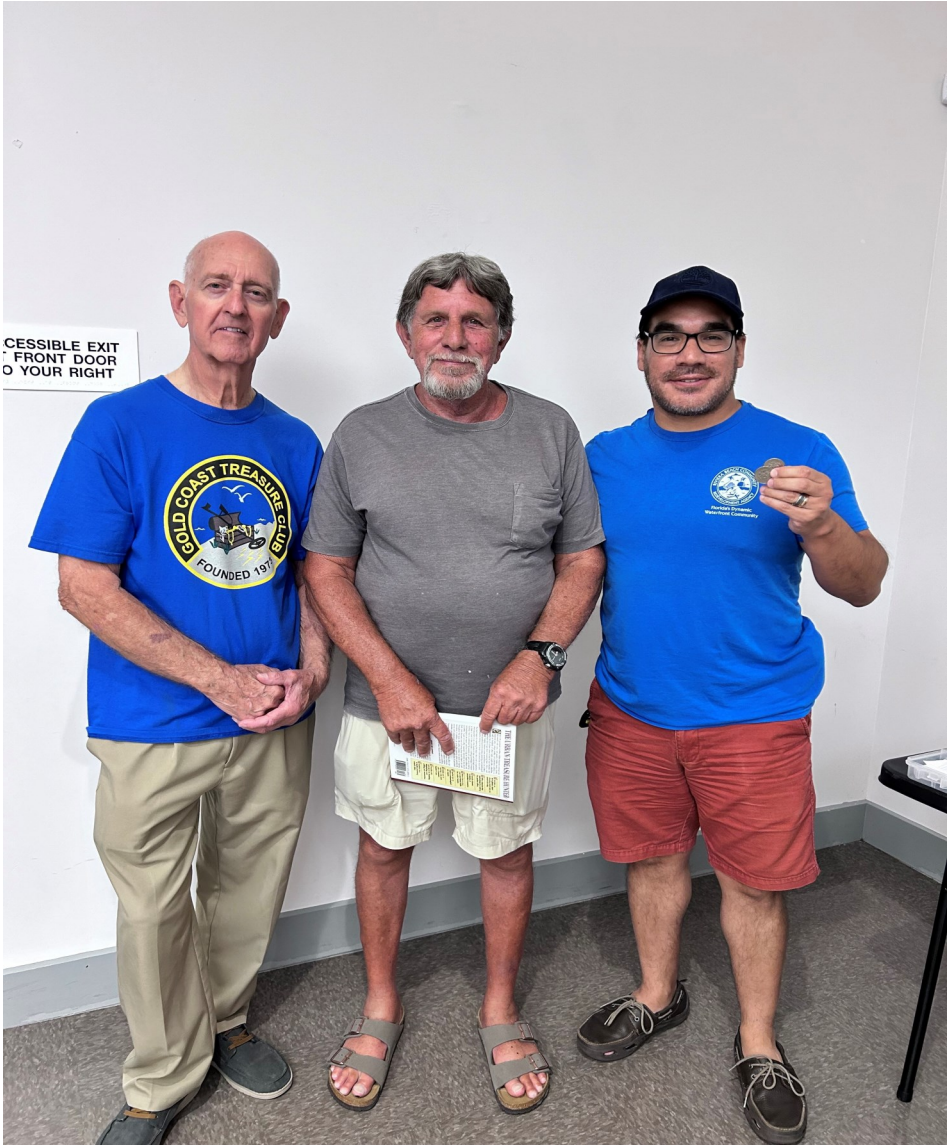

## **RE-SCAN & RE-DIG TO FIND MORE**

Don't stop digging just because you find one target when you dig. Take a few extra minutes and dig a little deeper and use your pinpointer to see if there is anything else there. This tip is especially useful when you find coins because where there's one there's often more.

## **HUNT AFTER RAIN**

Try going out searching while the ground is still wet. This helps you in two ways. First, it's much easier to dig in wet dirt than hard, dry dirt. Second, wet ground provides better conductivity so you may be able to detect targets that are buried deeper.
